

Joseph Turner

Senior Front End Developer

Profile

Experienced Senior Front-End Developer with 13+ years of building fast, responsive web apps that won't break the internet (or your patience). Proficient in Node.js, TypeScript, React, Next.js, and modern CSS frameworks (Sass, Less). Skilled in integrating with headless CMS and third-party tools and CI/CD pipelines to create seamless experiences. With a design background, I speak both code and creative, making collaboration a breeze. Strong communicator with a love for travel, food, fitness (even if I'm currently out of shape), and the occasional bad pun.

Employment History

Senior Front End Developer at Beyond, Inc, Midvale, UT / Remote

March 2023 — December 2024

- Created several front-end features related to search results page resulting in increased conversions and revenue
- Upgraded Next.js application from v12 to v15 using the app router
- Worked with Git, Next.js, Fastify, Node.js, GraphQL, RESTful APIs, yarn, Figma, and several other front-end technologies

Front End Developer II at Overstock.com (now Beyond, Inc)

October 2018 — March 2023

- Migrated from a legacy architecture to Next.js app and helped create the back-end-for-front-end app serving the search results and taxonomy pages
- Worked closely with the design team to implement a new feature for high-traffic pages, leveraging A/B testing to optimize user experience, which resulted in a 2%+ increase in conversion rates.

Senior Front End Developer at Accenture Interactive, Meridian, ID

January 2016 — October 2018

- Traveled to meet and coordinate with various clients on-site as well as collaborated remotely to create various front-end solutions
- Worked with SVN, Git, Grunt, Sass, Less, Handlebars, JavaScript, HTML, CSS, underscore.js, and jQuery

Front End Developer at Scentsy, Meridian, ID

June 2012 — December 2015

- Developed and maintained the front end of customer-facing .NET applications and user interfaces using JavaScript, HTML, and CSS
- Collaborated with design and back-end teams to ensure design integrity, user experience, and accuracy of business logic
- Worked with SVN, Git, Razor (.cshtml), Adobe Illustrator and Photoshop
